Personal Profile

A motivated, hard-working second-year Computer Science student, who is eager to learn new skills and computing knowledge in University, placement at ENTER COMPANY NAME and in my spare time. I have developed strong skills in programming, communication and teamwork inside the classroom as well as in my employment. I am enthusiastic about expanding my problem-solving and programming abilities in a professional environment.

Education and Qualifications

September 2023 – July 2027 **Ulster University, Belfast**

BSc (Hons) Computing Science

Year 1 Modules (Average: 59%):

- Introduction to Databases (62%)
- Innovation and Society (72%)
- Problem-Solving for Computing (58%)
- Introduction to Physical Computing (64%)
- Mathematics for Computer Scientists (56%)
- Client-Side Development (43%)

Year 2 Modules (Average: 68%):

- Systems Security (58%)
- Programming in Practice (70%)
- Software Product and Process Management (54%)
- Server-Side Development (75%)
- Data Analytics (81%)
- Computer Networking (68%)

September 2018 – June 2023 **St Louis Grammar School Kilkeel**

A-Levels: Business Studies (B) and Technology & Design (A)

BTEC: Level 3 Extended Certificate in Information Technology (Distinction*)

GCSEs: 9 Grades A* - C* including Maths (A) and English (C*)

Work Experience

Citi

June 2025 – May 2026 **Technology Analyst**

- Developed and maintained backend services using Java, Spring Boot, Maven, and Liquibase, contributing to a large-scale enterprise application.
- Built multiple REST APIs from scratch, including model, controller, service layers, and comprehensive test coverage.
- Delivered numerous vulnerability fixes, resolving dependency issues, upgrading Docker images, and improving system security using tools such as SNYK.
- Enhanced and refactored existing APIs by updating validation logic, handling complex business rules, and ensuring data integrity across services.
- Worked with Kafka to update schemas, manage topics, and integrate message-driven data into internal applications.
- Implemented database changes, including table renaming and schema updates, ensuring consistency across backend systems.
- Wrote effective unit and integration tests, improving reliability and early detection of defects.
- Collaborated in an Agile team environment, participating in sprint ceremonies, code reviews, and cross-team discussions.
- Produced technical documentation, including a Confluence user guide, to support internal users and improve onboarding.
- Assisted junior team members and supported onboarding activities, demonstrating strong communication and mentoring skills.

Laser Electronics Systems LTD

July 2021 – Present

Hardware and Software Technician

- Diagnose and repair software issues to ensure systems run efficiently.
- Perform fault-finding and diagnostics to resolve complex technical problems
- Design & analyse software
- Assisting customers and helping to resolve their issues
- Testing software before distributing to the market to ensure reliability
- Collaborate with international businesses to help distribute their products in our market
- Create concept drawings for new machines and software UI using GIMP
- Research emerging technologies and evaluate their effectiveness and potential impact

Projects

- Created software using Python and a Raspberry Pi, which gathers vital data from our clients' machines, organises it, and then sends the data to the clients
- Developed an 8-bit 2D Adventure Game using Java
- Designed a Blackjack style Card game using Java
- Developed a weather app with a weather API using Swift
- Recreated both Snake and Pong using Python and PyGame Library
- Constructed a personal portfolio website using HTML, CSS and JavaScript
- Designed video-playing software using a Raspberry Pi and programmed on Python

Skills

IT - Operating Systems

- Experienced in using the following operating systems: Windows XP, Windows 7 to 11, Linux (Ubuntu & Debian), Mac OS and Raspberry Pi OS

IT - Software Applications

- Proficient use of Visual Studios, Microsoft SQL Server 2017, Oracle DB, Eclipse, IntelliJ IDEA, PyCharm, Xcode, Brackets, Wireshark, Arduino IDE, Photoshop, and Gimp.
- Well-versed in using Microsoft Word, Excel, PowerPoint, Access, Publisher, Teams, OneNote, Visio as well as Google Docs, Slides, and Sheets.

IT - Development Languages

- Skilled in Python, Java, Swift, R and Arduino Software (IDE)
- Ability to use web development languages such as HTML, CSS, JavaScript and PHP
- Capable of using SQL for database management

Teamwork

- I have vastly improved my teamwork skills in my current job at Laser Electronic Systems LTD. I work with members from different backgrounds and skill levels to design and manufacture new machinery and software.
- My teamwork skills have enhanced during my degree through group project modules in both my first and second years.
- My group met weekly to discuss our progress and ensure that our actions would lead to our end goal on schedule. xs

Problem-Solving

- An example of using these skills was when I curated the map for my 2D game. I needed to create a text file with 250 digits across and 250 down. Rather than typing it line by line, I made a short Python program that would quickly generate the text file with as many rows and columns as I needed.
- I also continuously use my problem-solving skills in my workplace. Several of our customers were having faults with video-playing software on Raspberry Pi's made by a

different company in the market. I resolved the issue by designing new video-playing software, which helped dozens of our customers as it was more reliable.

Awards, Achievements

- Certificate in “Green Software for Practitioners” by The Linux Foundation
- Certificate in the “Fundamentals of Digital Marketing” by Google
- Certificate for “Introduction to Micro: bit” course by Ulster Outreach Academy
- Member of UU Computing Society (2023 – Present)
- Excellent Achievement Award at AS Level
- GCSE IT Certificate
